

# Disposable knife

## A high-performance cutting tool system

Blade is Comact's high-performance disposable knife product line. Manufactured using advanced processes, Blade products deliver consistent quality, precision, and reliability in demanding mill environments.

### HIGHLIGHTS

- Fast and accurate blade positioning through a unique clamping design
- High-quality surface finish supporting optimal grading and board recovery
- Durable edges
- Reduced cleaning time of contact surfaces
- Reduced operating costs
- Excellent abrasion and impact resistance
- Designed with attention to steel composition and ease of maintenance

### WHY CHOOSE BLADE AND COMACT

- 24/7 responsive technical support
- Dedicated Comact representative available on-site
- Proven expertise in cutting applications
- Advanced manufacturing processes ensuring product consistency and uniformity

### CURRENTLY IN OPERATION

More than 200 chip heads installed and operating

As an OEM, Comact designs and manufactures the equipment in which the knives operate. We know knives, and we know the machines behind them. That understanding allows us to quickly identify root causes and support mills with practical, effective solutions.

Our parts and service team is always available to assist you.
