

Enhanced debarker arms for superior performance

Comact's innovative debarker arms are engineered to withstand the toughest operating conditions, ensuring optimal performance and durability.

HIGHLIGHTS

- Integration of laser cladding technology
- Long-term resistance and extended lifespan
- Precise, consistent, and high-quality debarking
- Longer lifespan means less maintenance
- Wide range of debarker arms and tips in various sizes

SEAMLESS UPGRADE

Upgrading our debarker arms is hassle-free, even if you are currently using plate-style arms from other vendors. Our arms are engineered with the same bolt pattern, ensuring a seamless transition. Enjoy the benefits of enhanced durability and superior performance without the need for major modifications.

Unlike other competitors, Comact is an OEM and a manufacturing expert. We know debarker arms, but we also know the equipment being used and have the expertise to find the cause of the issue quickly, if any.

Whether you're debarking softwood or hardwood and processing small or large logs, we have the perfect solution for your specific needs. Let us help you unlock the full potential of your operations.

BENT PLATE STYLE KNIFE ARMS

- Increased debarking quality thanks to lightweight design
- Faster and easier maintenance
- Reduced marks on log entry point due to bending
- Increased arm durability due to less aggressive impact with bent arm

LASER CLADDING LEADING EDGE

- Increased resistance: no crack departure weak spots caused by carbide tips separating
- Increased durability of leading-edge protection compared with carbide tips that detach after a while
- Easy and consistent refurbishing

SAME BOLT PATTERN AS THE COMPETITION

- Quick, easy, and cost-effective upgrade from Lindsay, Nicholson, and Johnson debarker arms due to common bolt pattern and arm style

LASER CLADDING TIP DESIGN

- Increased wear resistance
- No carbide chipping after impact with rocks, nails, or other hard materials
- Less aggressive edge makes for good debarking quality from the first log

Contact us today to learn how Comact can help your operation perform at its peak, both now and in the long run.
