

High-performance Hybrid Sawline

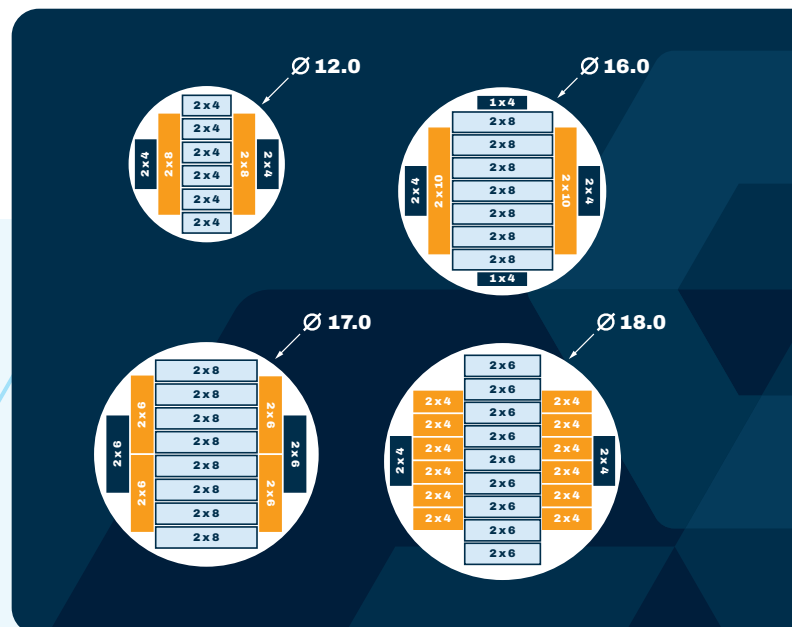

Speed, flexibility and innovation

Comact's Hybrid Sawline is the next generation in sawmilling technology, offering unmatched versatility and performance. Designed to handle a wide range of log diameters, this modular system integrates advanced circular saws, bandsaws and smart technologies to deliver maximum efficiency, sustainability, and profitability.

WHY CHOOSE COMACT'S HYBRID SAWLINE?

- **Enhanced flexibility:** Produce in a single line a wide variety of products, from standard dimensions to custom sizes.
- **Sustainability:** Reduce waste, lower energy consumption, and streamline equipment.
- **Future-ready design:** Modular and scalable to adapt to evolving market demands and technological advancements.

Eliminate the need for multiple sawlines and board edgers. Maximize your investment!

Key features

- **Hybrid cutting system:** Combines circular saws for high-speed processing and bandsaws for larger logs, enabling seamless handling of varied log sizes.
- **No cutting pattern limitations:** Features full profiling capabilities and sideboard splitting, enabling diverse product outputs in a single pass—without the need for an edger.
- **Smart Vision technology:** AI-driven optimization for log feeding, ensuring maximum efficiency.
- **Closed-loop quality control:** Automated real-time adjustments ensure precision and minimal waste.

Maximized efficiency

The Hybrid Sawline simplifies production with seamless integration of cutting systems and advanced technologies. Its modular design allows for easy upgrades, reducing operational complexity and long-term costs. Circular saws handle logs up to 20 in. (50 cm) in diameter while bandsaws tackle oversized timber, ensuring no recovery opportunities are missed.

A competitive edge

Stay ahead of the curve with a solution built for today's challenges and tomorrow's opportunities. The Comact Hybrid Sawline combines innovation, sustainability, and efficiency to set a new standard in sawmilling.
