

Smith Sawmill Service™

Your trusted partner in cutting tool solutions and on-site services

Smith Sawmill Service provides comprehensive cutting tool solutions, expert support, and on-site services designed to keep sawmills running at peak performance. Backed by Comact's industry-leading technology, we deliver unmatched reliability and efficiency—whether you need a single replacement blade or a fully integrated maintenance program.

Saws as a Service

Take the guesswork out of saw maintenance. With our full-service blade management program, we handle quality repair, sharpening, tracking, and logistics so your team can stay focused on production.

- Comprehensive service for stellite and carbide guided saws, trim saws, strobe saws, and large-diameter saws
- Blade tracking system with engraving and full repair history
- Pickup and delivery across 11 states
- Includes on-site expert support and operational training

Circular saws

From primary breakdown to trimming, our extensive selection of circular saws meets the performance demands of modern sawmills. Each saw is engineered for durability, accuracy, and optimized yield.

Applications:

- **Merchandise saws** – Available in 60", 72", 84", and 92", tailored for volume and toughness
- **Guided saws** – Engineered for precision cutting and performance in high-speed production lines
- **Edger saws** – Designed for clean, consistent edging in dimensional lumber production
- **Trim saws** – High-speed, wear-resistant options for trimming lines
- **Splitter saws** – Reliable and efficient separation across multiple grades or sizes

Disposable knives

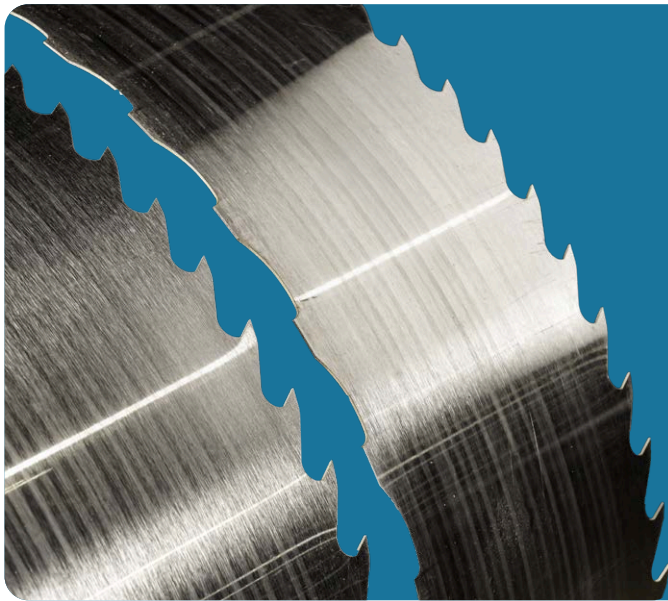

The most advanced disposable knives on the market—OEM-designed by Comact for maximum performance and efficiency.

- Lower production costs
- Local, comprehensive support
- Consistent quality and availability

Laser alignment services

Precision starts with alignment. Our expert field teams offer on-site laser alignment services to help ensure your cutting tools are installed and performing at their best. Maximize accuracy, extend tool life, and reduce operational wear with professional-grade alignment and consultation.

Wide bandsaws

We proudly supply Oleson-brand wide bandsaws, trusted across the industry for their durability and cutting precision. Manufactured using Uddeholm premium steel, our bandsaws deliver superior performance, extended blade life, and consistent cut quality—making them the preferred choice for sawmills that won't compromise on results. Backed by our expert support and distribution network, Oleson bandsaws are built to meet the highest performance standards in the industry.

Saw guides and guide dressers

Following Comact's 2023 acquisition of YGE, we now supply their high-performance saw guides under the Comact brand. These guides are trusted for their precision, durability, and consistent performance in demanding sawline environments.

To support guide maintenance, we also provide two models of YGE Guide Dressers:

- A manual version for simple, efficient use
- A CNC model for high-precision, automated dressing

Both options ensure your saw guides maintain peak condition, protecting your equipment and ensuring consistent cutting quality.

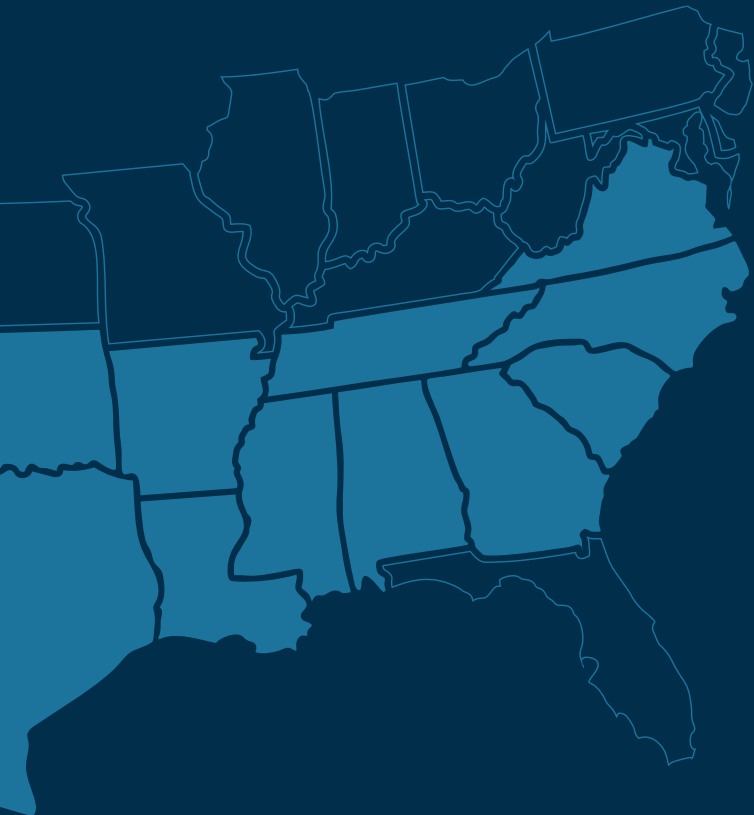

Why choose Smith Sawmill Service?

We are more than a supplier; we are a cutting solution partner with:

- Full-service support from procurement to maintenance
- Nationwide delivery and pickup network
- A team of saw filing experts, trainers, and service technicians
- Deep integration with Comact's optimization and cutting-edge systems

Whether you're redesigning one saw or managing a fleet of mills, our team is ready to help you maximize every cut.

Trusted by leading mills across North America

With decades of hands-on sawmill experience and over three billion board feet supported annually, Smith Sawmill Service is the go-to partner for mills that demand reliability, performance, and support that goes beyond the blade.

“

Smith Sawmill Service has been an invaluable asset to our southern operations. Their commitment to delivering a quality product and exceptional customer care is unparalleled. On every occasion that we have encountered issues, they have responded promptly, helped identify the root cause, and partnered in providing effective resolutions. Smith Sawmill Service has consistently gone above and beyond for our operations. This level of dedication to customer service is invaluable, ensuring we receive a consistent product that we can always depend on to perform.

”

– Dustin M. Wood, Director of Southern Operations, Biewer Lumber
