

**Where better
wood processing
technologies are
just the beginning**

An aerial photograph of a dense, lush green forest covering a hillside. The trees are tightly packed, creating a textured, undulating surface. The lighting is soft, highlighting the various shades of green from deep forest greens to lighter, sunlit areas. The text is overlaid on the right side of the image.

We innovate
without fear
of disruption.

At Comact, innovation isn't just a deep-rooted value—it's a mindset.

We are not afraid to disrupt our own portfolio if it means moving the industry forward. Our commitment to progress means we're willing to introduce technologies that push existing boundaries further because that's what true leadership looks like.

As long as a solution aligns with our vision of smarter, faster, and more sustainable operations, we believe it's the right path to take.

We don't just adapt to the future. We shape it.

– **Simon Potvin, president and CEO**

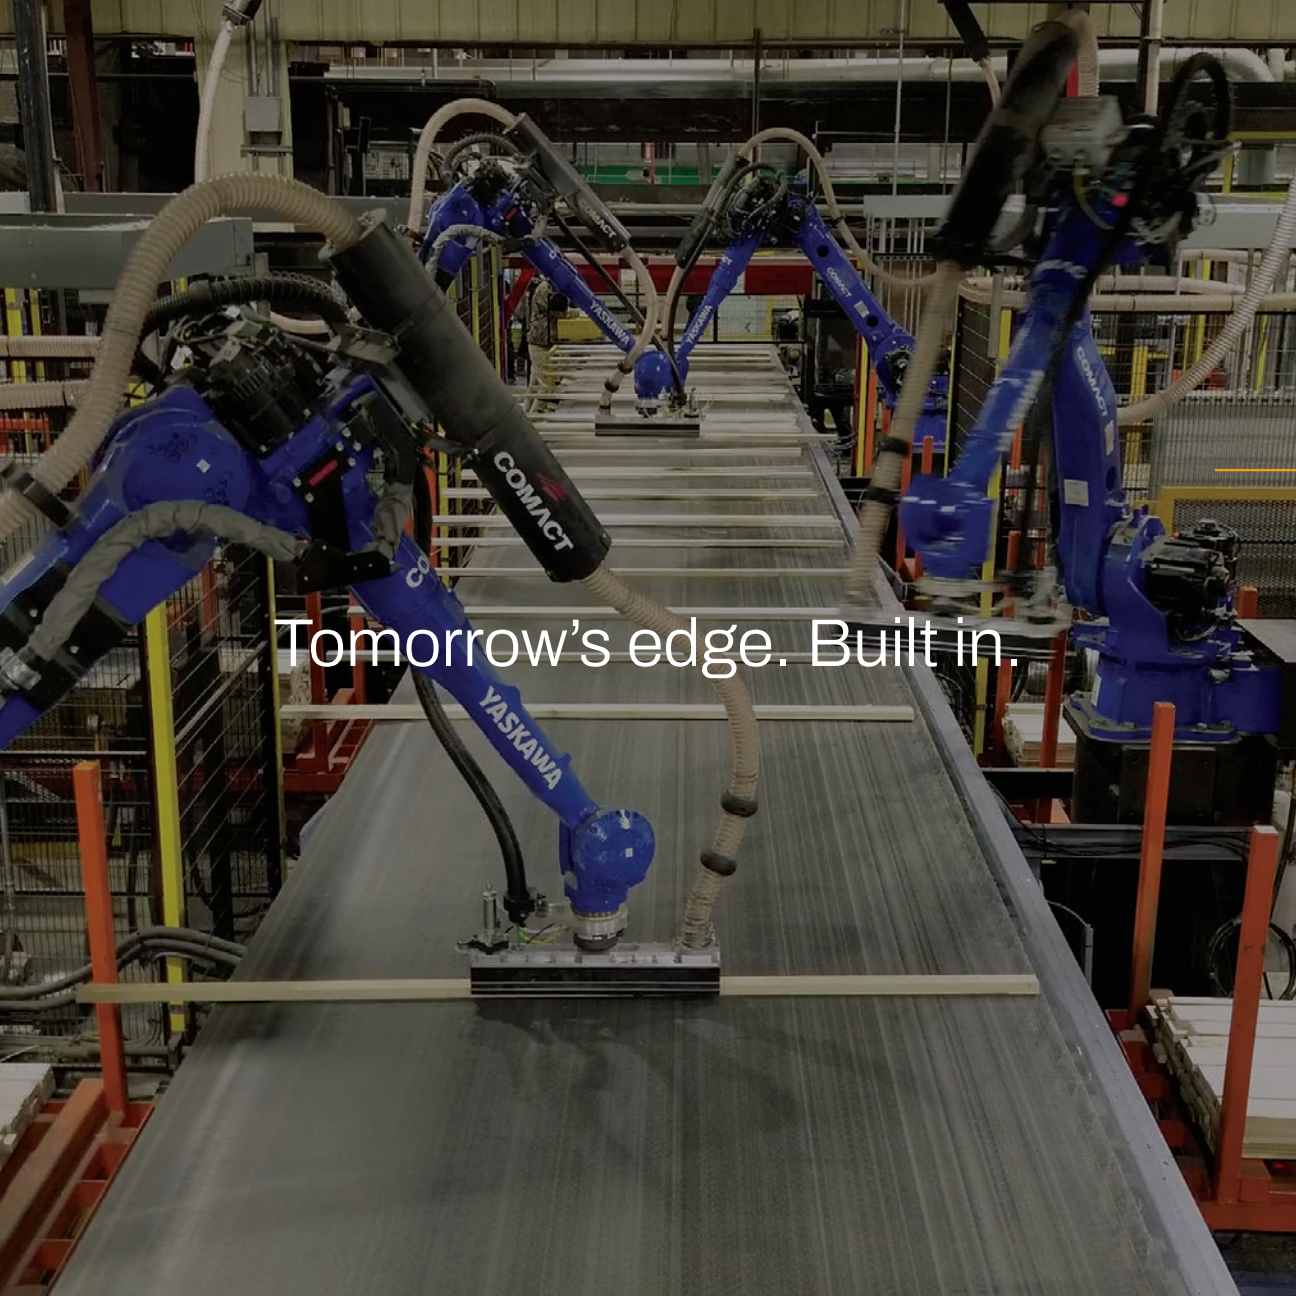

Built on a century of progress.
Focused on what's next.

OUR HISTORY

**It started over 100 years ago
with a few machines in a small
workshop in Quebec, Canada.
And how far we have come.**

Today, Comact is one of the most trusted leaders in wood processing technology across the globe. But what's made us a true OEM partner to wood processors isn't just our lineup of high-caliber equipment, digital technologies, cutting solutions, project services, and aftermarket support. It's the way we show up project after project, challenge after challenge.

Over **1,000**
clients worldwide

Tomorrow's edge. Built in.

INNOVATION

We're the catalyst for your future.

In today's volatile markets and rapidly evolving environment, leading wood processing companies recognize that sustained growth and profitability begin with investing in next-generation technologies.

At Comact, we make sure you're equipped to succeed: our multidisciplinary teams work hand in hand with you to ensure the perfect fit between advanced technology and real-world wood processing needs. In our purpose-built research and development centers, every solution is prototyped, tested, and refined long before it reaches your mill—so you can achieve 100% resource optimization at every step of your workflow.

We grade more than
50%
of North America's lumber.

COMACT
GradExpert

The sawmill of the future is powered by artificial intelligence (AI) and fully integrated operations, connected and enhanced by a single AI backbone. And future-proofing your business begins today, with technology that's ready now.

ARTIFICIAL INTELLIGENCE DEVELOPED IN-HOUSE

Our AI and wood processing experts fine-tune every nuance of defect and object detection for superior wood grading and optimized process flow.

CONNECTED OPERATIONS THROUGH A POWERFUL IoT PLATFORM

OPER8™ is a centralized digital solution designed to manage your production and maximize performance across your entire mill.

SMART VISION SYSTEMS

Developed by Comact, these one-of-a-kind solutions provide the foundation for adaptive, real-time process flow management.

ROBOTIC AUTOMATION AND SELF-HEALING TECHNOLOGIES

Our advanced tech enables continuous and high-efficiency operations with minimal human intervention.

At the end of the day,
output is what counts.

WOOD PROCESSING TECHNOLOGIES

When the right tech makes all the difference

Every piece of Comact equipment is engineered to help you push more volume, optimize quality, keep things moving, and hit your targets without compromise. We design, build, and support every solution with one goal in mind: real-world performance that delivers measurable business results.

We have been adding

70%

of new sawmill capacity
in North America since 2015.

WOOD PROCESSING TECHNOLOGIES

**Stem processing
and log handling**

**Edging and
resawing**

**Single-pass
breakdown**

**Kiln drying and
biomass energy**

**Scanning and
optimization**

**Cutting and
tooling solutions**

**Primary log
breakdown**

**Secondary log
breakdown**

**Green lumber
processing**

Planer mill

**Robotic
automation**

Because we cover the entire wood processing line, you get fully integrated, reliable solutions that are built to work as hard and last as long as you do.

ACCELERATED ROI FROM DAY ONE

Rapid commissioning for top-quartile profitability

For decades, Comact has been the go-to partner for sawmill startups—designing, fabricating, automating, installing and commissioning mills of any size. Our comprehensive approach slashes construction and ramp-up periods, delivering top-quartile profitability, rapid payback, and drastically reduced owner risk. Backed by hands-on training and transparent communication, your mill goes live modern, lean and ready to outperform right out of the gate.

From the moment
the land is ready to a fully
operational mill in just

12
months

20 greenfield projects
delivered
since 2015

MORE THAN MACHINES

We don't just back our machines—We back you.

We're in the field and the frontline. What better way to ensure your equipment delivers peak performance than by counting on the pros who designed, built, and installed it? Don't settle for less than Comact's accessible, end-to-end support.

Experience proven reliability over and over again.

This is what full-circle service looks like:

Remote technical support 24/7

On-demand on-site services

Spare parts, Parts as a Service (PaaS), and consumables

EverBlue™ program

Retrofits

Reliability programs

Online parts manual

Global Learning Center

featuring online learning programs
and a dedicated training center

WHATEVER IT TAKES. THAT'S OUR JOB.

We meet you where you are and move forward.

At Comact, we adapt to your operations—not the other way around. Whether you're working within legacy constraints, tight timelines, or shifting priorities, we find a way to make it work. With open communication, clear expectations, and full transparency at every stage, we're the kind of partner who figures it out and follows through.

We never settle
for less than the best.

Adaptable by design

Customized layouts and equipment designed to seamlessly fit into your existing footprint

Development of new functionalities and modular equipment to match your product mix and evolving needs

Solutions with continuous updates and upgrades to maximize your investment and adapt to changing requirements

Dedicated training and support to shorten the learning curve and help you reach and maintain peak performance

Agile project execution to meet even the most demanding deadline

350+

EXPERTS DEDICATED TO HIGH TECH

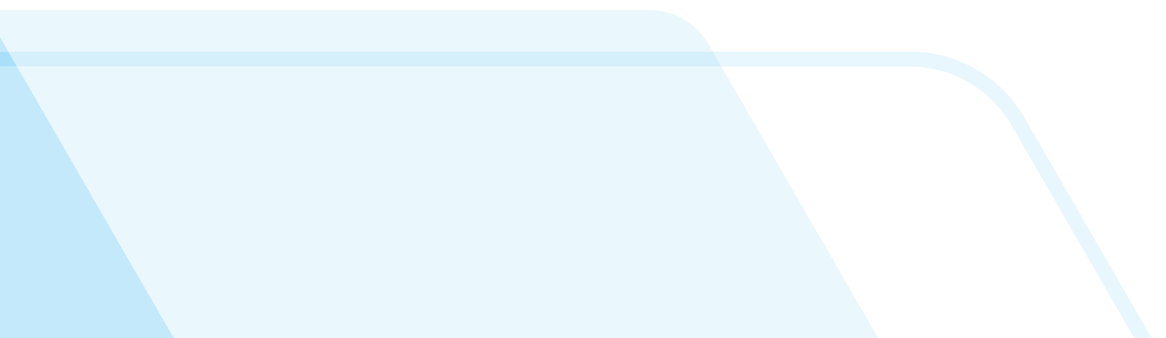

100+

specialists in wood processing

200+

employees dedicated to supporting our product fleet through different initiatives, such as EverBlue™ and Reliability

COMMITTED TO EXCELLENCE
DRIVEN BY INNOVATION

COMACT

Count on Comact.

Choose a partner that puts your success first.
